

1891 Census for BC, District K4, listed as North Nanaimo

This census covers the current day area of Mid Vancouver Island, that is now known as Nanoose, Parksville, French Creek, Qualicum, Qualicum Bay, Errington, Coombs, and Hilliers. A total of 150 persons listed in alphabetical order.

This census was transcribed in 1995 and is now made available through GENWEB for other researchers. Every effort was made to make sure the information transcribed was accurate. I do have photocopies of the original census pages and would be happy to refer to them should you find discrepancies with your data.
